

Call for new Editors for AQUA-LAC scientific magazine

During the last meeting of the Board of Directors, it was decided to make some changes including the renewal of its Editorial Committee. To do this, we are making a call to new editors, which can also be considered those members interested in becoming part again of this new conformation. In this regard, we encourage those who are interested in joining the new Editorial Committee to send an email to aqualac@unesco.org with copy to (phi.lac@unesco.org) before **November 5th 2018** with their curriculum vitae attached. The Aqua-LAC Board of Directors will consider the candidatures received in December.

Since its creation in 2009, Aqua-LAC has achieved a multidisciplinary approach in the dissemination of results from scientific and socio-economic research, including legal aspects, the use of innovative technologies together with the integrated and appropriate management of available water resources. Currently, thanks to the joint work of the Board of Directors, Editorial Committee, editorial staff as well as the reviewers and authors who have supported our magazine, Aqua-LAC has 19 periodical editions and more than 150 articles published <https://bit.ly/2Lw3Ugk>

We are very grateful to the Editor in Chief of the magazine, as well as to the other editors, authors and reviewers, for their valuable contribution to the success of this magazine.

The journal is currently in a systematization process for its management and indexing with the support of Universidad Autonoma de Querétaro. We are developing a digital platform that will begin to be used in 2019, which will be a breakthrough in terms of operation.
